GENERAL NOTES.

Capture of the Glaucous Gull (*Larus glaucus*) in Boston Harbor, Mass.
— On April 23, 1906, while gunning in Boston Harbor, off Quincy, Mass., with Mr. R. R. Freeman, we shot a Glaucous Gull (*Larus glaucus*). The specimen was in slightly immature plumage, having faint brown markings on the back and wings. It was in company with a flock of about four hundred Herring Gulls and especially attracted attention by being the only bird which, in response to calling and the waving of a handkerchief, approached within gunshot. The identification of the specimen was verified by Mr. William Brewster by the examination of one of the wings.

Recent Occurrence of the European Teal and the Marbled Godwit near Portland, Maine.— My collection contains a male European Teal (*Nettion crecca*) which was shot in Casco Bay by a fisherman on April 6, 1903. I had the satisfaction of seeing it before it received the attentions of a taxidermist, thus making perfectly sure that no deception was practised in the case. It is a remarkably beautiful and highly typical specimen. So far as I am aware, it is the first of its kind recorded for this State.

The Great Marbled Godwit (*Limosa fedoa*) is represented in my collection by a female shot on Scarborough Beach, August 16, 1904, by Mr. George H. Cushman, a game warden. For many years the species has been almost unknown in this locality.— HENRY H. BROCK, *Portland, Me.*

Baird's Sandpiper at Newfound Lake, Hebron, N. H.— While on a morning's collecting trip September 4, 1906, on the marshes at the head of Newfound Lake, Hebron, N. H., we obtained a specimen of Baird's
